HAY SENDS OUT WORLD'S FAIR ORDERS.

Diplomats Urged to Do All in Their Power to Secure Government Exhibits.

GOOD NEWS FROM MR. BARRETT

Commissioner General to Asia Reports That China, Japan and Korea Will Participate in the Fair on Extensive Scale.

Washington, Sept. 25.-Secretary Hay has sent urgent instructions to all of the United States diplomatic officers abroad to do everything within their power to insure displays at the World's Fair from the countries to which they are accredited.

The purpose was not only to insure coniderable individual displays by great manufacturers and merchar **. but also to have the various Governments themselves make national exhibits, as these features of international fairs usually have been the more

Encouraging reports are coming in now, and one just received from Commis-General John Barrett conveys the gratifying announcement that China, Japan and Korea will participate in the Fair on a much more extensive scale than they have undertaken in any preceding international

The three countries named have agreed not only to prepare comprehensive exhibits, but to erect buildings on the Fair grounds and send imperial commissioners to represent them.

Commissioner Barrett has started on a tour of Southern China, bound for Australia and New Zealand. Both of these great English colonies have declined the invitation of the United States Government to participate in the World's Fair. It is the belief here that this decision was brought about through a misunderstanding of the scope of the Exposition, and Mr. Barrett's reports indicate that they may be led to reonsider their action.

BILL FRAMED TO REGULATE SALE OF MINERAL WATER.

Health Commissioner Starkloff Will Have the Measure Introduced in the City Council.

The new ordinance makes it the duty of every manufacturer, importer, druggist and dealer, who manufactures or sells any natural or artificial mineral, spring or other water for drinking purposes, to file under oath the name of such water, from where and whom obtained, together with the chemical and bacteriological analysis, when manufactured and the formula used in the production, giving quantitatively and qualitatively each item and material entering into its composition. No person may sell, manufacture or bottle any mineral carbonated or table water in St. Louis without the permission of the Board of Health. Questions are provided for the applicant to answer in obtaining permission, which ncludes, among the others, methods of filtering. A fine of from \$100 to \$500 is pro-

vided for violations. Commissioner Starkloff explained that purious if not unhealthy water is sometimes sold under false labels, and he thought the matter should be regulated in

Council thought the pure-food law could be made to take in the waters. Doctor Albert Merrell asked whether the city could undertake to regulate this water when it furnished impure water to its own citizens

Mrs. Dina Pulte, 53 years old yesterday, relebrated the anniversary at the home of her daughter, Mrs. Annie Schleifarth, No. 1525 Chouteau avenue, by entertaining a few of her lifelong friends and her family. The German designation for afternoon reception is "kaffee klatch" and kaffee klatch consists of coffee drinking and gossiping. Mrs. Pulte has lived to years in St. Louis, She remembers the city when Main street was the only paved thoroughfare. On this ivenue, facing the river, was her home in the old days. Her reminiscences, and those of her friends, were the chief subject for conversation yesterday. Mrs. Putte's

health is still good, and her demeanor the gathering was the inevitable recalling of the many dear ones, known in the years gone by, who are dead.

Her husband was a doctor. He died ten years after his arrival in this city from Westphalia, now a German Province. One son, Herman Puite, lives at Terre Haute, Ind. A daughter resides at San Diego, Cal. The son is now Il years old.

C. SPAIN CONTINUES TO PAY INDEMNITY TO AMERICANS.

Obligations Incurred in 1834 Might Have Been Regarded as Wiped Out by Recent War.

Washington, Sept. 25.—The Treasury De-partment has begun distribution of \$28,500, the sum received from the Government of Spain as one of the annual payments of indemnities due under the treaty of 1834. The continuation of these payments is regarded as a marked evidence of the high sense or honor cherished by the Spanish people in meeting an obligation.

About 1818 some American merchant ships were seized and destroyed by Spanish national vessels and when the matter was brought before a tribunal, an award was made in favor of the United States citizens for the amount of their losses. The princihealth is still good, and her demeanor pal was converted by a curious Spanish method to perpetual rentes, and the Spanish Government has met the interest on these with great regularity ever since the treaty of 1834.

By a rule of international law, war absolutely extinguishes treatles previously existing between the principals, but the Spanish Government did not regard itself as thus relieved by its recent war with the United States, and the only discomfort to which the scrip holders were subjected was in a slight deferment of two payments dur-
